

HOVERJACK[®]

Lifting • Floor Recovery • Evacuation

FACILITATE CHALLENGING PATIENT LIFTS

HoverJack®

- **Easy to Use:** Single valve for inflation and deflation.
- **Reliable & Durable:** Lift patients from floor to stretcher/bed. Teflon coated bottom for easy transport across all surfaces.
- **System Flexibility:** Allows for use anywhere in the facility, including tight spaces like bathrooms.

SIMPLIFY STAIRWELL EVACUATIONS

Evacuation HoverJack®

- **Safe and Supportive:** Cross-body straps and foot pouch ensure secure patient transport, even down stairs.
- **Enhanced Comfort:** Inflatable head wedge provides respiratory support during evacuations.
- **Versatile:** Suitable for various environments, including tight spaces and outdoor areas.

TRANSPORT IN EMERGENCY SITUATIONS

EMS Evacuation HoverJack®

- **Secure Patient Handling:** Full body harness, patient safety straps and foot pouch ensure stability during transport and evacuations.
- **Efficient Transport:** Multiple transport handles and straps for controlled patient transport.
- **Enhanced Patient Comfort:** Inflatable head wedge provides respiratory support during extended evacuations.

Accessories

HT-Air® 1200 Air Supply

The HT-Air® 1200 Air Supply offers two air flow speeds and a variable speed air flow option. The HT-Air can be used with our full range of products to maximize product efficiency.

Air400G

The Air400G Air Supply offers rapid inflation of HoverMatt and HoverJack products.

HoverJack® Cart

The HoverJack® Cart is a rolling storage system that allows caregivers to easily respond in the event of a patient fall. With a standard size top basket and larger bottom basket, this cart holds the HoverJack, Air Supply and a HoverMatt transfer mattress.

HoverJack® Battery Cart

The HoverJack® Battery Transport System offers a durable, ergonomic solution for portability and storage of a HoverTech Air Supply and any HoverJack device, featuring the added convenience of a built-in, rechargeable battery.

With its spacious, lightweight and easy to steer design, the HoverJack Battery Transport System is an all-in-one resource for Rapid Response Teams.

The HoverJack may also be used with the HoverMatt to safely extract a patient from a vehicle.
